

The benefits of the US Cargo Systems (USCS) latest Omni-Directional Caster Assembly is now extended to the 777-200F Fleet.

As a worldwide leader in the design and manufacture for in-aircraft cargo loading systems for nearly all types of commercial freighter aircraft, this Caster Assembly is certified as PMA equipment and directly interchangeable with original equipment manufactured by UTC Aerospace Systems.

Description

Manufacturer's Part Number: 68190-102

Component Type: Caster Assembly

Two piece component design bolted together for use in omni-directional transfer mat or tray assemblies.

Single crowned roller design with heavy duty sealed bearings with a combined radial limit load rating that exceeds 7000 lbs.

Aluminum machined frame piece designed for easy rotation that includes a race fitting with exterior lip to maintain lubrication for radial needle bearing for extended operational life.

Lowest Operating and Maintenance Costs

Certification and Applicability:

Aircraft Type: 777F Series

Certification: FAA-PMA

Approved Replacement for UTC Aerospace Systems Part Numbers 77FM200-1

U.S. CARGO SYSTEMS
